

*Cyprus has recently introduced the **Digital Nomad Visa Scheme** that allows remote workers to live in Cyprus and legally work for their employer or their own company registered abroad. The Scheme allows third-country nationals, who can perform their work location-independently using telecommunications technology, to reside (temporarily) in Cyprus.*

Digital Nomad Visa Holders shall benefit from the following:

- ✓ They have the right to stay in the country for up to 1 year, with the right of renewal for another 2 years.
- ✓ They can be accompanied by their family members, who are granted, upon request, a temporary residence permit that expires at the same time as that of the financial supporter of the family. During the stay in Cyprus, the spouse or partner (concerns persons who have entered into a civil partnership agreement) and the minor members of the family are not allowed to engage in any form of economic activity in the country.
- ✓ If they reside in the Republic for 1 or more periods totalling more than 183 days within the same tax year, they shall be considered Cyprus tax-residents, provided that they are not tax residents in any other State.

○ **Criteria**

Third-country nationals can apply for a Cyprus Digital Nomad Visa if the following main conditions are satisfied:

- They can perform their work remotely through telecommunications technology;
- They are employed in a company registered outside Cyprus, for which they can work remotely or they are self-employed offering services remotely for clients located outside of Cyprus;
- They can prove that they have stable and sufficient monthly net income of at least €3,500.

○ **Processing time**

The time of examination of the application is approximately between 5 – 7 weeks.

Please contact our Firm for more information and/or assistance in relation to the Digital Nomad Visa Scheme.
Our team is in a position to assist and is ready to advise you through all the procedure.
